

Catena-X@Volkswagen Group

Steffen Poetsch

Project Lead Catena-X
Volkswagen Group

Volkswagen Group officially commits to **Catena-X** as future **standard for data exchange** in the automotive supply chain.

Board decisions across entire Volkswagen Group

- **Catena-X standards & services** set as Group standard internally and externally
- **Broad activation** of supply chain partners
- **Use cases implementations** in Procurement, Quality, Logistics, Sustainability, and Circular Economy
- **Intensified internal IT infrastructure, process, and data enabling**

In 2024 Volkswagen exchanges data in three Catena-X Use Cases

Strengthening The Supply Chain with **PURIS**

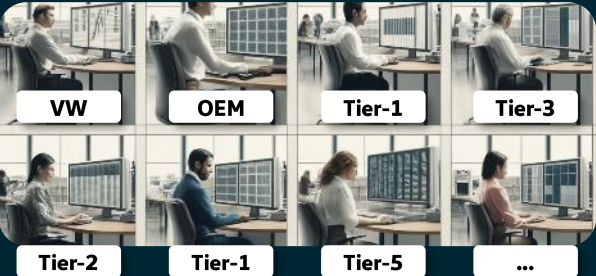

Ready for real data exchange

Improved Quality Issue Resolution with **QUALITY**

Live

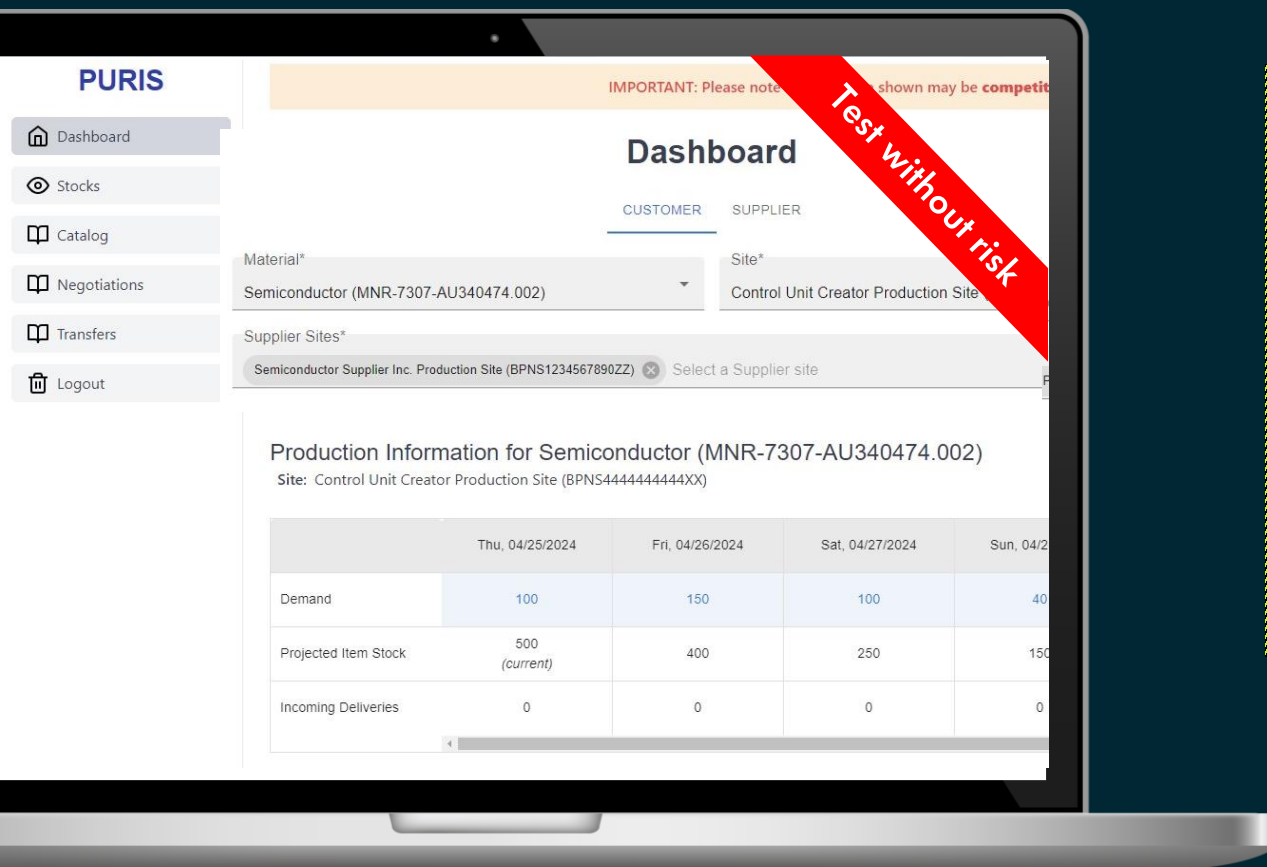

Increasing Master Data Quality with **BPDM**

Live

What's in for me? With PURIS you can get more and better information to avoid short-time bottlenecks.

PURIS – Predictive Unit Real Time Information Service

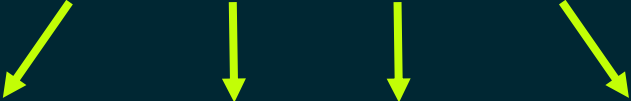

- > SIMPLIFIED COMMUNICATION – ONE standardized communication format / get rid of Excel, PDF, ...
- > MORE INFORMATION – Additional information (prod. planning, inventory, ...) lead to better planning
- > KEEP CONTROL – Decide what you want to share with whom
- > REDUCE EFFORTS – Data provisioning via app → more time for predictive acting instead of task-force "re-acting"

The PURIS FOSS App* is a free-available open-source package.
Get & deploy it on → <https://eclipse-tractusx.github.io/>

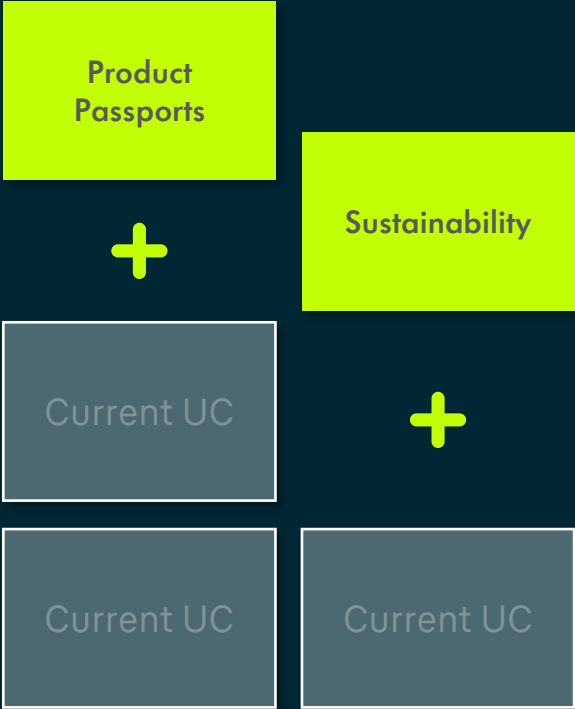

In 2025 Volkswagen plans to scale existing Use Cases and to implement new ones
